AKPOL ADAM KUŚ

AKPOL company was established in 2005 on the grounds of the decision No. 7645-1/20/2005. We have been dealing with reclycling of plastics since the very beginning.The waste plastics we collect are processed directly in our plant under the supervision of complex monitoring. This guarantees that each stage of production is under a strict quality control. The qualified and experienced staff take care of the highest quality of regranulates we produce. We have new and innovative equipment for recycling. Our monthly capacity is 1 500 tons of granules.The waste material is collected from all over the European Union. We guarantee permanent cooperation with regard to purchases of waste material. We issue KPO, DPO, DPR documents.

Produkty i usługi: 1. High density polyethylene (hd pe) granules. 2. Polypropylene granules (pp). 3. Purchase of waste plastics.
