

SIS GROUP

We are a company active in the field of renewable energy – specially photovoltaics. We build our own solar farms, preparing PV project for sale and provide services for PV investors. We have already 4 MW our own PV plants and we are preparing another 30MW new PV projects.

We are coordinator of local Energy Cluster and we are active in the field of energy policy. Advancement in the cluster organization was appreciated by the Ministry of Energy - cluster was included in the prestigious list of pilot clusters of the Ministry of Energy and it received a special distinction.

We are looking for technological and financial partners to invest and operate on fast growing Polish PV market.

Products & Services: -We professionally deal with the preparation of all documentation for PV projects. -We specialize in writing applications for grants from the EU for investments. -We are open to investors – we are preparing 30MW new PV projects. -We provide investors with solar panels and other devices
