DAMIKO SC

We would like to introduce DAMIKO S.C, operating on the IT market since 2004. We provide advanced, flexible technological solutions and world-leading IT software.Our work is based on: IT infrastructure management realized due to the comprehensive implementation of IT solutions:

• protecting IT systems – providing data security and protection

• running a Helpdesk, a Servicedesk and remote administration

• implementing IT solutions for medicine

• providing proprietary solutions (e.g. Web-based and mobile applications)

• conducting IT training courses

DAMIKO's excellent team specializes in the field of systems for managing IT infrastructures and data security and protection.

Our experience and the quality of the services we provide have been confirmed by references and certificates obtained from companies such as Symantec, VMware, Microsoft, Intel and others.
