

JATECH RAFAŁ LACHOWSKI

Jatech Company was established on 2 November 2011 and it is a spin-off of a company founded in 1995. It mainly focuses on construction and manufacturing of ceiling lighting.

Our mission is to manufacture, develop and promote lighting systems based on the latest advancements in the LED technology. In our products we use both SMD (Surface Mounted Device) and COB (Chip On Board) lighting diodes. Our flagship products are LED COB2, ceiling lights equipped with cutting edge electronic microwave motion sensors. So far hundreds of residential buildings in major Polish cities have been supplied with this type of lights.
