

HABER ENERGIA

Hulanicki Bednarek sp. z o.o. was established in 1982. Since then, the company has been developing very fast, which allowed it to become one of the top producers of the energy distribution systems in Poland. Thanks to qualified and experienced staff and immense professional involvement, we offer the highest quality products fully designed by us to our customers. We specialize in the production of: systems for energy switching and distribution in nn networks • systems for reactive power compensation • power supply systems for industry, power engineering and power industry, shopping and services centers, multi-family buildings. • controlgear assemblies • metallic enclosures for low-voltage modular switchgear and controlgear assemblies certified by the Institute of Electric Power Engineering in Warsaw no. DN/022.2012 • external wall panels • metal-free products from best quality material: furniture, shelves. Using our developed machinery we provide all kinds of services related to sheet metal processing and metal folding, flat punching and flat folding, CNC milling, laser engraving, welding as well as powder painting. For our clients we ensure transport, warranty and 24h service. Cooperation with you and your company can get great satisfaction.

Products & Services: Low voltage up to 6300A and medium voltage up to 24kV

Country: Poland
