

# MTM NOWUM SP. Z O.O.

MTM NOWUM offers services in the field of manufacturing of internal and underground water, sewage, gas network and heating systems. We have highly qualified staff and a number of certificates for industrial welding. As the only company in the Lubelskie Voivodship we have such high competencies which allow us to build a high-pressure gas supply system. We have a large amount of our own equipment – cranes, excavators, pipelayers, HDD drilling machines. We always closely follow the development of technological innovations and adjust the level of expertise and the quality of service to the highest European standards.
