

BRACIA MROZIK SP. Z O.O.

BRACIA MROZIK company is the biggest Polish manufacturer of natural veneers. The company was established in 1996. It was founded by three brothers: Janusz, Bogdan and Witold Mrozik. From a small enterprise which initially employed 10 people, the company has developed to a position of the major tycoon in Europe. The company is still owned by the Mrozik family and the owners, who have great knowledge and experience in veneer production, still manage it. The company has its production plant in Łaszczów (Tomaszów Lubelski Powiat). Continuous production of the company includes beech, alder, oak and ash veneers of thickness from 0.6 mm to 2.5 mm. The company manufactures veneers from own materials as well as provides services in slicing customers' raw materials. Products are also available in the form of layons (edge-glued) and edgebandings. We produce pellets (diameter 6 mm) from waste material generated in veneer production.

Products & Services: Manufacturer of natural veneers (regular offer includes beech, oak, alder, ash wood veneers), wooden pellets and edge bandings. The company offers sliced veneer faces and custom cutting from the provided materials.
