

SIPMA S.A.

SIPMA S.A. is a solid company built on a sustainable development basis which uses the latest technologies and management methods. Our innovatory production technologies and agricultural machines change the image of Polish agriculture and create new farming production trends. The customer care policy has become an imperative in our business, based on high quality products, reliable services and a comprehensive access to original spare parts. As a result of our long-standing operation, we have created unique production and service possibilities for individual and group customers. Our products successfully compete with those made by other producers.
