

# WIKPOL SP. Z O.O.

We pride ourselves on being able to deliver comprehensive end-to-end services. We focus on challenging and non-standard applications and solutions requiring broad expertise in engineering, and also use state-of-the-art advances in technology. In our applications we always strive to deploy the most suitable technological solutions. We follow the latest technological trends and development directions.

We specialize in manufacturing:

- palletizing, de-palletizing and bulk-packaging systems based on industrial robots,
- packaging systems,
- industrial scales.

We achieve our objectives via:

- efficient implementation of new technologies,
- delivering comprehensive solutions,
- recruiting engineering professionals with extensive expertise in technology,
- business integrity.
