

OSKO-PLAST S. C.

Osko-Plast specializes in the metalwork industry. The company is a family business. In Osko - Plast, the most valuable asset is a man – both the client and the employee. We offer:

- 1) Metalforming presses. We have presses from 16T to 100 T pressure, guillotines, etc.
- 2) Conventional and CNC machines.
- 3) Co2 and argonshield welding.
- 4) Point welding

Our company mainly specializes in making metal elements and mechanisms such as:

- combine harvester sieves;
- step plates;
- concaves;
- sprayer parts (e.g. hand winches – 80 and 120 kg capacity);
- ladder fitting (hinges and accessories);
- combines and other agricultural machinery parts;
- sliding gates and top sliding doors hardware;
- various brackets;
- others.

All of products are covered by a warranty .

Products & Services: Combine harvester sieves, sprayer and combine parts, ladder fitting, sliding gates hardware, CAD/CAM design.
