

AGENCJA „RAKI” ROBERT PŁYWACZ

The company's offer is addressed to modern businesses who care both about their employees and partners. Own technical facilities and experienced staff provide efficient preparation and conduct of each event. We put special emphasis on the attractions for the little ones. These include: pneumatic attractions (inflatable slides, castles, dry pools, playgrounds) or mechanical ones such as: Eurobungy, trampolines, carousel floor, electric cars, rodeo bull, a wide range of animation activities (painting faces, bambonada, klockolandia (related to bricks), colourful parachutes, gypsum figurines, etc.) and the organization of interesting fictional playgrounds. Theme events are one of our proposals for the organization of interesting and fun events, picnics or meetings with contractors. Interesting scenarios, an unconventional approach to each topic, professional organization and operation of each event are the elements that distinguish the company.

Products & Services: Organization and operation of stage events, promotion and advertising.
