

# TABAL

TABAL has been operating on the market since 1990.

We provide complex treatment of aluminum and steel.

For many years, we have been cooperating with the largest European steelworks, we conduct wholesale trade of non-ferrous metals, aluminum and highly alloyed steel. We also deliver a complete system of aluminum profiles.

We have our own, the most advanced powder paint shop in the country.

We offer our contractors full assortment of non-ferrous metals, among others, bronze, brass, copper and aluminum, perforated metal sheets, stainless and acid-resistant steel, as well as structural plastics.

Our construction department designs solutions that can be implemented in the construction of machines, devices and complete technological lines.

Thanks to experience, as well as a team of excellent engineers and constructors, we deliver only top class products.

Meeting the demand of clients and of the market, we systematically supplement our offer with new assortment of goods, preserving care for their top quality
