

CEGIELNIA CEKOBUD

At present Cekobud s.c. is the biggest producer of brick in the region. Its tradition dates back to the forties of the previous century. Thanks to our long-standing experience and well matched personnel we guarantee the highest quality of our products. We produce handmade bricks of loessic clay up to 15% porosity, which prevents the so-called 'sweating of walls'. Moreover, in the winter the walls built of this type of brick keep warmth in the rooms, whereas in the summer they keep a pleasant chill in the building. The bricks we produce are approved by 10, 15 and 50th class certificates and are fully frost resistant.

Produkty i usługi: The genuine handmade brick.
