# Lubelskie as the energy depot for industry

- ✓ Large hard coal deposits - the Lublin Coal Mining District (18.7%4 of national deposits).
- ✓ Favourable conditions for the development of renewable energy sources:
  - a. Lubelskie Voivodeship is located in the area which is considered to be one of the best places to use solar energy in Poland.
  - b. There is a possibility of implementing small hydro power plants.
  - c. Approximately 130 areas proposed for the development of wind energy.
  - d. Biomass energy – reserves of land for growing energy crops.
