

TRANSPOL RUDNIK & PAWLISZUK SP.J.

Transpol terminal offers reloading services for goods transported by rail in broad gauge wagons from Ukraine to Poland. It is situated on the East-West transport corridor near the border crossing point in Dorohusk.

We offer reloading services for various types of goods: these transported in loose bulk form as well as thick liquids and construction materials. We have the ability to reload agricultural products, biomass, wood, coal, aggregate, molasses and steel. We specialize in reloading biomass and agricultural products. We use covered hall which meets all quality, phytosanitary and veterinary requirements during the process of reloading. We also reload steel and constructions. Besides freight handling, we offer customs storage services at our open customs bounded area.
